

DECISION INTELLIGENCE FOR CROSS-MARKET TRADING

Markets disagree. We trade the gap.

An auditable AI trading agent that challenges, governs and scores every decision.

CROSSIGNAL

Created by Omobolaji E Adeyan

Trading agents generate signals. Few can defend a decision.

01

Fragmented

Single-market analysis misses information moving between rates, credit and equities.

02

Unaccountable

LLM conclusions are difficult to reproduce, challenge or audit after the outcome.

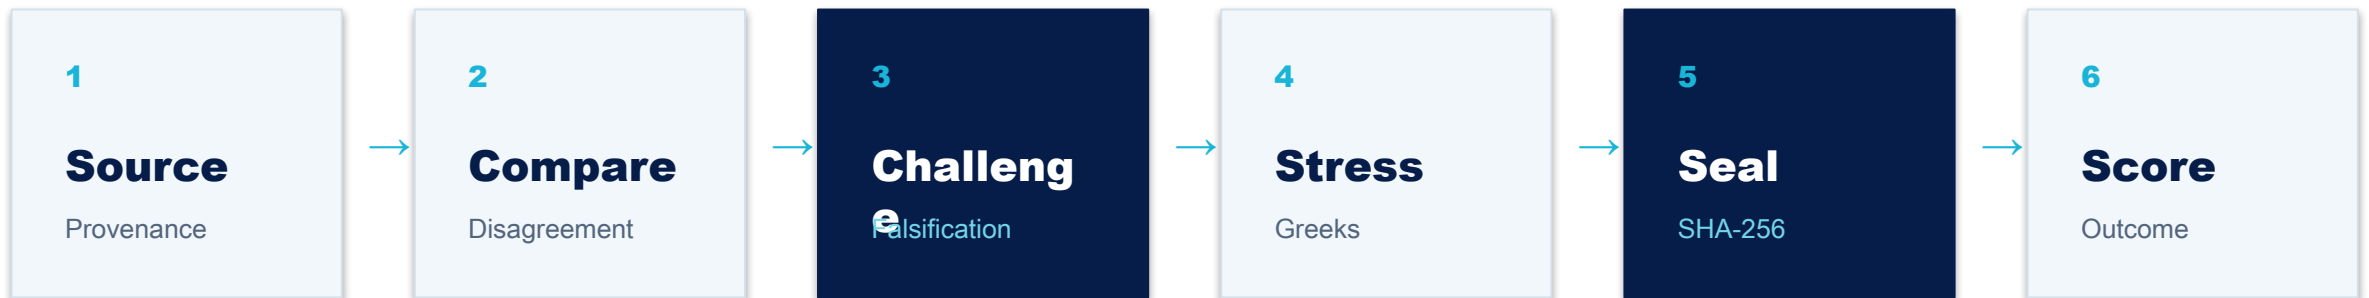

03

Unmeasured

Most agents do not precommit a forecast and later score whether it was right.

A scientific proof chain for every trade

The SIGNAL protocol turns a thesis into a governed, falsifiable decision.

ABSTAIN is a successful outcome when evidence or execution quality is insufficient.

Alpaca is the market and execution backbone

LIVE EVIDENCE

- Stocks and options
- Quotes, volume and Greeks
- Account and positions
- Alpaca News context

CROSSIGNAL

- Claude macro synthesis
- Deterministic construction
- Risk and stability gates
- Sealed Decision Contract

PAPER LIFECYCLE

- All-leg preflight
- Multi-leg paper orders
- Fill reconciliation
- Explicit recovery state

Every AI trade is placed under oath

BEFORE THE OUTCOME

- Decision Replay reconstructs only evidence known at decision time
- Adversarial review challenges the thesis before authorization
- SHA-256 contract exposes any post-outcome rewriting

AFTER THE OUTCOME

- Alpaca Greeks drive transparent scenario stress
- Agent, inverse and cash comparisons reduce storytelling
- Portable evidence receipt lets judges verify the proof chain

Safe by architecture—not by prompt

Public UI Read-only replay

Broker Exact paper endpoint

LLM No direct tool access

Evidence Secret-free receipts

Recovery Explicit approval

News Untrusted context

NIST AI RMF and SSDF aligned · voluntary and tailorable · not NIST-certified

The accountability layer for AI-assisted trading

WHO NEEDS IT

- Active options traders
- Small investment teams
- Broker and platform providers
- Risk and compliance teams

HOW IT GROWS

- 01 **Professional SaaS**
- 02 **Team governance**
- 03 **Broker partnerships**
- 04 **Enterprise policy APIs**

VALUE

**Faster
review.
Stronger
trust.**

THE PROOF IS PUBLIC

Inspect the intelligence. Challenge the decision.

31

automated tests

6/6

Greeks coverage

5 days

scoring horizon

**CrossSignal does not merely recommend a trade.
It proves whether the trade deserves authorization.**
